

Accessibility Guide for Companies

Introducing the Accessibility Guide for Companies to the European Parliament

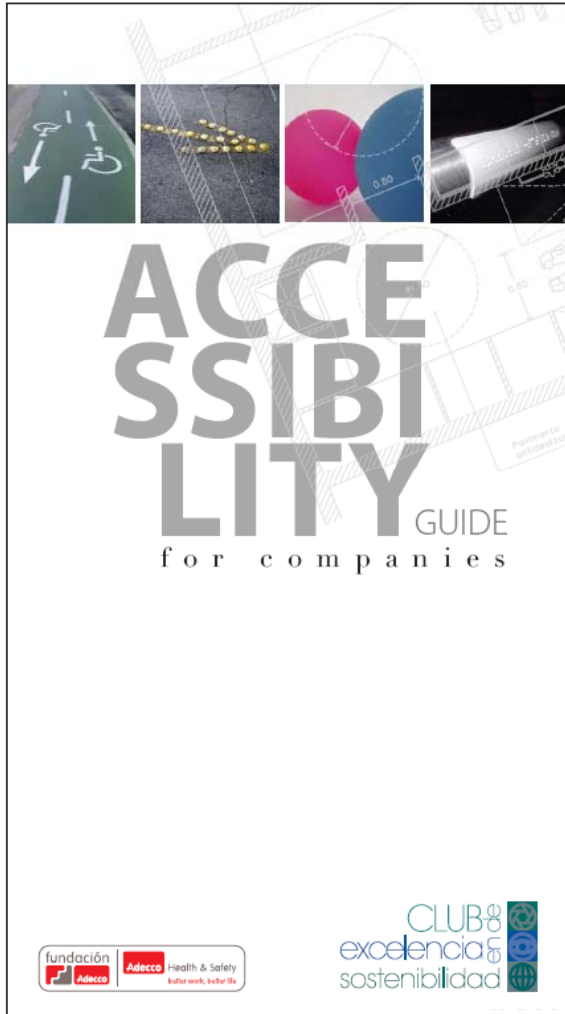

13 January 2010, 16.00 -18.00

Brussels, European Parliament, Altiero Spinelli Building, A3G-3

*Hosted by Ramón Jáuregui Atondo,
MEP and Secretary General of the spanish S&D Group at the European Parliament*

The Accessibility Guide for Companies analyzes and presents criteria regarding the accessibility of spaces, routes, elements, furniture, products and services in our surroundings with the purpose of raising awareness on current regulations, and also mastering all of the necessary details for applying accessibility in a discrete fashion with standardized criteria and normally used designs for everyone on the elements, works, products, and services that a company provides. It is essential to train companies so that they can apply accessibility criteria to their buildings in the near future and provide areas for all employees whether they have limited capabilities or not.
